Full Stack Developer

Practical AI-assisted Full Stack Developer with real-world experience building custom websites, internal business systems, SaaS-style tools, and workflow automations. My strength is turning business problems into clear software requirements, then building, testing, and delivering working solutions with modern tools and AI-assisted workflows. Experienced across Next.js, Node.js, PostgreSQL, and WordPress, and responsible for reviewing, testing, and improving every implementation.

Work Experience

Full Stack Developer

2025 – Present

Mas Pharma -- Istanbul, Turkey

- Building a connected ecosystem of internal and SaaS-style systems for the pharmaceutical market.
- Turning repeated business problems into structured software that organizes workflows and reduces manual work.
- Delivered the first major system and continuing development on the remaining modules.
- Using AI tools throughout development for code generation, refactoring, debugging, and code review.

Tools: Next.js, Node.js, PostgreSQL, Custom Components, SaaS Development, AI-Assisted Development

Full Stack Developer

2022 – 2025

Afamy Pharma -- Gaziantep, Turkey

- Built multiple custom WordPress websites with theme editing and custom plugin development.
- Created custom forms and automation workflows for complex client requirements.
- Handled site structure, design adjustments, and business-specific functionality for pharmaceutical clients.

Tools: WordPress, Custom Plugins, Theme Editing, PHP, JavaScript, Forms Automation

IT Assistant

2021 – 2022

UOSSM French -- Erbil, Iraq

- Provided IT support for office staff and daily operations.
- Maintained computers, printers, network access, and basic office systems.
- Handled software setup, troubleshooting, and technical support.
- Supported file organization, documentation, and digital office workflows.

Key Areas: IT Support, Troubleshooting, Office Systems, Hardware/Software Setup
